

# International Safety Training College

**Course Title** Cherry Picker/ Scissor Lift Operator

**Course Ref:** 61.020

## Description

This module introduces participants to the principles of safe work using aerial platforms including cherry pickers and scissor lifts. The theoretical aspects of the course are complimented by practical sessions during which basic operations are explained.

**Course Outcomes** By the end of this two day course, successful delegates will have an understanding of:

- General Safety Rules
- Manual handling guidelines
- Planning and execution of work
- Using the aerial platform safely
- Safely features on aerial platforms
- The effects of the centre of gravity on stability
- The capacity chart
- Materials Safety data sheets
- Routine inspection and repairs

Case studies involving aerial platform accidents are discussed to warn Participants against taking unnecessary risks.

## Practical

The practical sessions will make use of platforms in use at one of the participants premises. Sessions will involve a brief explanation of the Platform operations manual and basic operations are explained.
